

Automotive Brochure

A key challenge for the owners of classic cars is maintaining them. Reverse engineering can ensure that your classic vehicle can enjoy a longer future. The older and rarer the classic vehicle gets increases the task of sourcing original manufactured spare parts. However Kräftig Manufacturing and Engineering can combine modern engineering techniques with classic engineering principle to solve almost any spare part problem. We can accurately reproduce classic car parts through reverse engineering.

Automotive Services Offered

- Replacement parts
- Prototype development
- Reverse Engineering of original parts
- CNC milling (4th axis) & turning / CAD CAM facility
- Batch production
- High volume production
- Maintenance machining
- Light fabrications (mild & stainless steel)
- Welding (S/S, aluminium, cast iron)
- Conventional turning & milling (low volume machining)
- Specialized machining
- Toolmaking (injection moulds, press tools, electrodes, jigs & fixtures)
- Production of specialized parts for special vehicles. - UJ Solar car.
