

Services Offered

We are specialists in the field of precision engineering and machining. We service a diverse market and our technical ability enables us to manufacture various complex parts and components. Parts range from fabrication, reverse engineering, to plant refurbishing and machine building. Our clients are players in the Pharmaceutical, Food Industry, Mining, Automotive, Industrial and other sectors of the economy. We also beat load shedding with our two generators with a combined output of 300 KVA.

Services Offered

- Import replacement parts
- Prototype development
- Reverse Engineering
- CNC milling (4th axis) & turning / CAD CAM facility
- Batch production
- High volume production
- Maintenance machining
- Machine building
- Light fabrications (mild & stainless steel)
- Welding (S/S, aluminium, cast iron)
- Conventional turning & milling (low volume machining)
- Machinery refurbishment
- Pharmaceutical packaging tooling
- Toolmaking (injection moulds, press tools, electrodes, jigs & fixtures)
